

Inaugural Statement: The "Philosophical Civilization" Project

- **Vision:** Our goal is not to restore the past, but to envision the "Cosmic Human" by building a "Philosophical Civilization" that transcends the modern existential dilemma. Our project is an academic and methodological endeavor to reinterpret the human condition and read history with a renewed critical spirit.
- **Mission:** To establish a rigorous intellectual platform that brings together the academic elite and free thinkers to formulate a "New Cosmic Vision" based on:
 - **Deconstructing Traditional Systems:** Filling the conceptual gaps in major doctrines (from Hegelian Idealism to Historical Materialism).
 - **Logical Cohesion:** Building an epistemological framework that links the heritage of human wisdom with the challenges of future urbanization.
 - **Change through Consciousness:** Proposing cognitive alternatives that contribute to creating a human being aware of their destiny, capable of achieving a qualitative shift in the history of human consciousness.
- **Methodology:** We adopt "constructive criticism" and "continuous revision." There is no sanctity for ideas above the truth, and no hesitation in correcting the knowledge path whenever we find more precise and rigorous insights.

"Philosophical Civilization... Towards a New Humanity with a Comprehensive Cosmic Vision."
