Manifesto of "Cosmic Sovereignty": The Theoretical Foundation of the Possible Human *(Version 1.0 - January 2026)*

- **The Law of Ascending Becoming:** Existence is not static matter but a constant "Becoming." True progress is measured by the alignment of the human rhythm with the universal cosmic order.
- **The Predatory Cycle:** Human history has been trapped in the "Predatory Cycle"—a biological urge for "Possession." This has created an existential "Distance" between our material reality and our cosmic essence.
- **Sovereignty over the Self:** The cornerstone of our project. It is the conscious "Pruning" of predatory instincts to transition from "Extending through Possession" to "Extending through Being."
- **Future Memory:** We do not recall a past; we activate a "Future Memory" of our cosmic potential. Knowledge is the "Cultivation" of internal awareness.
- **The Cosmic Synthesis:** Merging the "Serenity of the East" with the "Vitality of the West" to create the Cosmic Human—a sovereign being within the "Commune."
